GARY | Truck City of Gary plans to move from its present location west of Gary/Chicago International Airport in late January to a new state-of-the art facility it will build at 25th Avenue and Taft Street.

The airport authority on Thursday approved paying the 61-year-old business \$820,000 for its current location on West Chicago Avenue. In addition, the authority approved spending up to \$60,000 to resolve liens on the land.

The airport is buying the land to make way for its \$90 million runway expansion project.

Truck City General Manager Gerri Davis said the company will invest \$5.5 million in its new truck repair and sales facility.
